Professional Summary

IT professional with a versatile skill set spanning application development, system administration, AWS cloud fundamentals, and cybersecurity. Has shipped production web apps for real clients. Experienced in managing databases and operating systems, and configuring services like Cloudflare for performance and security. Uses AI tools to accelerate coding, troubleshooting, and continuous learning. Comfortable working across development and infrastructure, with a growing focus on building and maintaining secure systems.

Core Competencies

- Application Development (Web/API) & SEO
- Database Administration & Management
- OS Administration (Windows/Linux)
- AWS Cloud Fundamentals (EC2, S3, IAM)
- Docker, Kubernetes & Workstation Imaging
- Cloudflare / CDN & Network Configuration
- Cybersecurity Fundamentals & Best Practices
- AI-Assisted Development & Workflows
- Troubleshooting & Technical Problem-Solving
- System Monitoring & Maintenance
- Version Control (Git/GitHub)
- Continuous Learning & Adaptability

Technical Skills

Languages & Frameworks: Java, Spring Boot, TypeScript, JavaScript, React, Python, C#, Tailwind CSS

Data & Cloud: MySQL, Firebase (Firestore, Auth, Security Rules), Supabase, Cloudinary, Vercel, AWS

Tools & Delivery: Git & GitHub, Docker, Kubernetes, Jenkins, Cloudflare CDN, Vite, Vitest, Flutter, Unity

Systems & Security: Linux, Windows, VMware, Cisco networking, Active Directory, web application security

Professional Experience

IT Support | Concentrix

Aug 2025 – Nov 2025

Internship

- Provided end-to-end technical support across a large-scale corporate IT environment, including OS installation, BIOS configuration, and workstation imaging for employee onboarding.
- Resolved help-desk tickets efficiently while installing and configuring business applications and security tools on enterprise endpoints, ensuring minimal downtime for end users.
- Applied security patches and monitored endpoint compliance across managed workstations, supporting adherence to company IT security policies.
- Administered user accounts, permissions, and access rights via Active Directory; diagnosed and resolved LAN/WAN connectivity issues to maintain workstation uptime.
- Supported cable management and physical setup of enterprise network and hardware infrastructure.

Key Projects

Illuminance Aesthetica — Salon & Spa Management Platform

Jul 2026 – Present

Client Project | React 19 | Firebase (Firestore, Auth, Security Rules) | Tailwind CSS | Vite | Recharts

- Built a multi-role business platform for a salon and spa, with separate owner, manager, and staff workspaces governed by Firestore security rules and a role-aware routing layer.
- Delivered booking management, point-of-sale checkout, service catalog, client records, gift certificates, staff scheduling, and QR-based attendance tracking in a single application.
- Implemented an owner analytics suite (financial reports, payroll computation, and revenue trend charts) backed by real-time Firestore listeners.
- Wrote automated security-rule verification and database seeding scripts, plus a Firebase emulator workflow, ensuring access control was tested before every deployment.

RecordLog — Document Tracking System

Jun 2026

Client Project | React | Firebase (Firestore, Auth) | Supabase | Recharts | Vite | PWA

- Built an internal system for logging incoming and outgoing records, replacing paper and spreadsheets.

- Implemented file attachments with an in-app viewer, autocomplete-assisted data entry, an audit log of every record change, and an internal messaging module between staff accounts.
- Added a dashboard with volume and trend charts, one-click print and export, offline support, and light/dark theming, shipped through multiple production releases based on direct user feedback.

Apartment Management System

Aug 2026

Client Project | React 19 | TypeScript | Firebase (Firestore, Auth) | Vercel Serverless | Cloudinary | Vitest | PWA

- Built a fully typed rental-property management system covering unit occupancy, tenant payments, expense tracking, and owner reporting for a multi-building rental portfolio.
- Designed a strict two-role model (owner and viewer) enforced entirely in Firestore security rules, with no client-writable role documents, covered by an automated rules test suite on the emulator.
- Added signed Cloudinary uploads through Vercel serverless functions for receipt attachments, plus PDF statement generation and installable offline-capable PWA support.

Limestone Tracker — Construction Expense Ledger

Jul 2026 – Present

Client Project | React 19 | Firebase | Vercel Serverless | Google Drive API | Recharts | jsPDF | Groq API | PWA

- Built an expense ledger for a construction management firm, with every receipt compressed in the browser and stored in Google Drive through a serverless upload.
- Delivered receivables, payables, reimbursements, billing status, and contract value tracking, plus P&L, cash flow, and savings reports exported as branded PDFs.

ClientFlow — SEO Agency Client & Team Workspace

Apr 2026 – May 2026

Client Project | JavaScript (ES Modules) | Firebase (Firestore, Auth) | Supabase Storage | Groq API | PWA

- Built a workspace for an SEO agency that tracks each client's deliverables (SEO, technical, development, link building, and content) as dated entries with attachments, against renewal dates.
- Implemented team management (member records, attendance calendar, task planner, activity log, and semi-monthly payroll) and an AI assistant that answers from the agency's own records.

AI Notes — AI-Powered Notes & Planning App

Jul 2026 – Present

Personal Project | React 19 | TypeScript | Firebase (Firestore, Auth) | Zustand | Tailwind CSS | Groq API | PWA

- Built a free productivity app, live at aistickynotes.vercel.app, combining notes, calendar events, weekly tasks, goals, habits, itineraries, a focus timer, and dated trackers in one workspace.
- Developed an AI companion grounded in the user's own notes that answers, drafts, tags, and creates notes and events from chat, plus a mind map and real-time collaborative note links.

OJT Attendance Management System

Sep 2025 – Nov 2025

Personal Project, Concentrix | Java | Spring Boot | MySQL | REST API

- Identified the manual intern-attendance gap during the Concentrix internship and independently built a full-stack replacement, now used by real interns and IT staff.
- Built an intern portal for badge-based time-in and time-out with a chatbot for scheduling and badge questions, and an admin dashboard with real-time attendance statistics and role-based permissions.

Additional projects: Vanima Atelier (client; orders, inventory, and sales analytics), Lookwhatchera (AI tourist guide with map pinning), Harana Hub (AI karaoke scoring).

Education & Certifications

Bachelor of Science in Information Technology

Jan 2022 – Dec 2025

ICCT Colleges Foundation, Inc.

- **Capstone, Smart Parking System** (Java, Spring Boot, MySQL, IoT): led development end to end, including a real-time revenue dashboard, vehicle-entry tracking, e-wallets, and automatic fare computation.
- **Java Programming NC III**, TESDA Manila; **AWS Cloud Practitioner Essentials** (course)

Achievements

- **FIDE-rated chess player:** ranked 43rd in the Philippines (October 2020), peak rating 2198.
- **Multiple-time open tournament champion; UAAP chess silver medalist** (2018) for Adamson University
