Professional Summary

IT professional with a versatile skill set spanning application development, system administration, AWS cloud practitioner, and cybersecurity fundamentals. Experienced in managing databases and operating systems, and configuring services like Cloudflare for performance and security. Uses AI tools to accelerate coding, troubleshooting, and continuous learning. Comfortable working across development and infrastructure, with a growing focus on building and maintaining secure systems.

Core Competencies

- Application Development (Web/API)
- Database Administration & Management
- Operating Systems Administration (Windows/Linux)
- AWS: Cloud Practitioner Essentials - foundational knowledge of Amazon EC2, Amazon S3, IAM, AWS networking, security, and cloud architecture
- Docker, Imaging, Kubernetes
- Cloudflare / CDN & Network Configuration
- SEO Fundamentals
- Cybersecurity Fundamentals & Best Practices
- AI-Assisted Development & Workflow Optimization
- Troubleshooting & Technical Problem-Solving
- System Monitoring & Maintenance
- Version Control (Git/GitHub)
- Continuous Learning & Adaptability

Technical Skills

- Languages & Frameworks: Java, Spring Boot, TypeScript, JavaScript, React, Python, C#
- Data & Cloud: MySQL, Firebase, Supabase, Cloudinary, Vercel, AWS
- Tools: Git & GitHub, Docker, Kubernetes, Jenkins, Cloudflare CDN, Vite, Vitest
- Systems & Security: Linux, Windows, VMware, Cisco networking, Active Directory

Professional Experience

IT Support | Concentrix

Internship

Aug - Nov 2025

- Provided end-to-end technical support across a large-scale corporate IT environment, including OS installation, BIOS configuration, and workstation imaging/deployment to streamline employee onboarding.
- Resolved help-desk tickets efficiently while installing and configuring business applications and security tools on enterprise endpoints, ensuring minimal downtime for end users.
- Applied security patches and monitored endpoint compliance across managed workstations, supporting adherence to company IT security policies.
- Administered user accounts, permissions, and access rights via Active Directory; diagnosed and resolved LAN/WAN connectivity issues to maintain workstation uptime.
- Supported cable management and physical network setup, gaining hands-on exposure to enterprise network and hardware infrastructure.

Key Projects

Illuminance Aesthetica - Salon & Spa Management Platform | Client Project | Jul 2026 – Present
React 19 | Firebase (Firestore, Auth, Security Rules) | Tailwind CSS | Vite | Recharts

- Built a multi-role business platform for a salon and spa, with separate owner, manager, and staff workspaces governed by Firestore security rules and a role-aware routing layer.
- Delivered booking management, point-of-sale checkout, service catalog, client records, gift certificates, staff scheduling, and QR-based attendance tracking in a single application.
- Implemented an owner analytics suite — financial reports, payroll computation, and revenue trend charts — backed by real-time Firestore listeners.
- Wrote automated security-rule verification and database seeding scripts, plus a Firebase emulator workflow, ensuring access control was tested before every deployment.

RecordLog - Document Tracking System (Client Project) | Jun 2026

React | Firebase (Firestore, Auth) | Supabase | Recharts | Vite | PWA

- Built an internal document-tracking system for logging incoming and outgoing records, replacing a manual paper-and-spreadsheet workflow.
- Implemented file attachments with an in-app viewer, autocomplete-assisted data entry, an audit log of every record change, and an internal messaging module between staff accounts.

- Added a dashboard with volume and trend charts, one-click print and export, offline support with network-status awareness, and light/dark theming.
- Shipped and iterated the system through multiple production releases based on direct user feedback.

Limestone Tracker - Construction Expense Ledger (Client Project) | Jul 2026 – Present

React 19 | Firebase | Vercel Serverless | Google Drive API | Recharts | jsPDF | Groq API | PWA

- Built an expense ledger for a construction management firm, with every receipt compressed in the browser and stored in Google Drive through a serverless upload.
- Delivered receivables, payables, reimbursements, billing status, and contract value tracking, plus P&L, cash flow, and savings reports exported as branded PDFs.

AI Notes - AI-Powered Notes & Planning App (Personal Project) | Jul 2026 – Present

React 19 | TypeScript | Firebase (Firestore, Auth) | Zustand | Tailwind CSS | Groq API | PWA

- Built a free productivity app, live at aistickynotes.vercel.app, combining notes, calendar, weekly tasks, goals, habits, itineraries, a focus timer, and trackers.
- Developed an AI companion grounded in the user's own notes that answers, drafts, tags, and creates notes and events from chat, plus a mind map and live shared notes.

Additional Projects: Vanima Atelier (client; orders, inventory, and sales analytics), Lookwhatchera (AI tourist guide with map pinning), Harana Hub (AI karaoke scoring).

Education & Certifications

Bachelor of Science in Information Technology | ICCT Colleges Foundation, Inc.

Jan 2022 – Dec 2025

- Capstone: Smart Parking System (Java, Spring Boot, MySQL, IoT), led end to end, with a real-time revenue dashboard, vehicle-entry tracking, e-wallets, and fare computation.
- Java Programming NC III | TESDA Manila
- AWS Cloud Practitioner Essentials (course)

Achievements

- FIDE-rated chess player: ranked 43rd in the Philippines (October 2020), peak rating 2197.
- Multiple-time open chess tournament champion
- UAAP chess silver medalist (2018), former Adamson University player
